

All logistics solutions in one place

Logistics for e-commerce

We developed a quick way to handle processes, such as warehouse, goods and orders management. You no longer need to do these actions by your own. Therefore it's every delivery options in one place and opportunity to manage your business remotely.

How does it work ?

1. Incoming parcels are being checked, accepted and sorted by SKU (Stock keeping unit).
2. The goods are **assigned** to the **corresponding** areas, **accordingly**.
3. Orders are being prepared, packed individually, **marked** and forwarded for delivery.
4. Order is handed to the courier chosen by the buyer.
5. Inspection of the **returnable** goods, it's **repairment**, acceptment, repackaging.
