## Description

UAB Santonika is one of the largest Lithuanian pharmaceutical companies based in Kaunas devoted to manufacture of pharmaceutical preparations for external contract manufacture clients. Santonika possesses all necessary resources to perform the entire product manufacture process from manufacture, packaging, quality control to release and wholesale distribution of pharmaceutical preparations. Santonika is proud of being considered contract manufacture partner to several world's leading pharmaceutical companies as our mission is being trusty partner in this field. The key of our success is client orientation, reliability, flexibility and competent staff.
