Description

JSC, 'Baltic Car Equipment' is a fast-growing IT company that manufactures GPS/GLONASS equipment for vehicle tracking and develops software packages for corporate fleet management. Since 2006 'Baltic Car Equipment' has become one of the largest manufacturers of telemetry equipment in the Baltic states. Constant investments into R&D have allowed us to present international markets with advanced equipment in telemetry and automotive security field. Employing over 60 professionals, the company controls every stage of its products - from initial design and manufacturing to installation and support (the last two - in Lithuanian market). Our aim is to provide products and services of highest quality, ensuring control and reliability to our customers worldwide.
