Description

LTD “MG Steel” is the manufacturer of metal constructions (including stainless steel) for various industries (pipelines, building structures, lightweight structures, various tanks, reservoirs, bridge supporting structures, parts, etc). Company was established in February (2019), based in Mazeikiai, north-western Lithuania. We are ambitious, innovative and ready to thrive. Since we started work with all kind of various projects we gained competence to manage highest standarts and quality of our production, also our high qualified employee’s are the key to success too. We feel responsibility for every bit it’s made by our company. Our goal - become a trusted partner, create relations and the future that works as swiss watch.
