Description

8devices is a company engaged in the development, manufacturing, and sales of unique design and functionality electronic equipment. Many years of expertise in hardware engineering and software design allow us to deliver exceptional quality products with the best price-performance and quick time-to-market approach. Our company also works with OEM and ODM wireless equipment projects and can develop your own software and hardware solutions based on your specification list. Since the year 2016, we are an official ADC (Authorized Design Center) of Qualcomm Atheros concentrating on IoE (Internet of Everything) products and projects based on Qualcomm Atheros chipsets for commercial and industrial applications.
