## Description

The company produces and sells containers of hardwood and softwood split firewood. The provided services are always based on the wishes and requirements of the client. The company, taking into account the individual needs of the customer, can produce containers and wooden pallets of various dimensions and specifications, or their individual parts. The company's activities have been developing consistently since 2020 - with the introduction of new technologies, the company is constantly improving, thus keeping pace with its supply and quality in a competitive market. Using efficient and modern equipment, every customer order is executed on time and with high quality. Production capacity is increased by finding the optimal number of employees and the use of technology, as a result of which the number of sales is growing every year. The expanding storage area of production facilities, raw materials and products provides an additional guarantee to meet the customers needs immediately upon request.
