Description

Public entity "Science and Technology Park of Institute of Physics" (STP) is a non-profit organization active in the fields of physics and technology sciences, innovations, knowledge society, and scientific research. Promoting business and science collaboration are one of the key priorities. The park can perform functions of technological business incubation in its activity fields – provide laboratories and offices, services of business management, information, consultations, qualification training, others. It coordinates activities of "Laser & Engineering Technologies Cluster" (LITEK™) and Digital Innovation Hub "LaserLT DIH".

Business Line

Specialized science and technology park for the growth of laser, optical, and engineering companies

List of products

Directions of activities • commercialization of research results; • organization of the place and conditions for the acquisition of know-how; • integration of physical, technological, and business sciences; • technology business incubation; • business development and coordination consultancy; • „Laser and Engineering Technologies Cluster“ coordination of activities.
